

Magic Filter

- Change your style while keeping the background

Challenges and Contributions

- ① How to transfer one specific object? -- A mask generator to crop the portrait
- ② How to make it accessible for non-expert users? -- A web app
- ③ How to make it helpful for developers to build applications? -- A light-weight C++ library
- ④ How to maintain the diversity for users? -- 6 style transfer models and 2 mask generators
- ⑤ How to run it on CPU-only devices efficiently? -- Deployment with C++
